Daksha Yadav

Full-Stack Developer | AI & Agentic Systems

Lucknow, India | yadavdaksh4090@gmail.com
GitHub | LinkedIn

Education

VIT Bhopal University *Sep 2023 – Present*
B.Tech in Computer Science and Engineering
St. Mary's Inter College *2020 – 2022*
Higher Secondary Education

Experience

Software Engineering and Development Intern *May 20, 2026 – Jul 31, 2026*
MPOnline Limited Bhopal, India
A joint venture between the Government of Madhya Pradesh and Tata Consultancy Services Limited.

- Completed a 10-week software engineering and development internship, contributing to the development of **Granthalaya**, a full-stack library management system.
- Developed catalog management, physical book inventory, borrower registration, staff management, and borrowing/return workflows using React, TypeScript, ASP.NET Core, C#, and SQL Server.
- Implemented Admin/Librarian authorization using ASP.NET Core Identity and database-level safeguards against duplicate active loans for the same physical copy. Verified functionality through 39 backend tests, including 7 SQL Server-backed tests, and 5 Playwright browser journeys.

Technical Skills

Languages: Python, C#, TypeScript, JavaScript, SQL, HTML, CSS
Frontend: React, React Router, Tailwind CSS
Backend: ASP.NET Core, FastAPI, Flask, Node.js, Express
AI & Agentic Systems: LangGraph, LangChain, MCP, RAG, Embeddings, ChromaDB
Databases: PostgreSQL, MongoDB, Microsoft SQL Server, Entity Framework Core
Tools & Testing: Git, GitHub, Docker, Podman, xUnit, Playwright, Vitest

Projects

TripWeave – Multi-Agent AI Travel Planner GitHub | Live Demo
React, TypeScript, FastAPI, LangGraph, LangChain, MCP, PostgreSQL

- Built an AI-powered travel planning workspace using a LangGraph supervisor that interprets trip constraints and dynamically routes requests to specialist agents for flights, hotels, weather, and budget planning.
- Integrated external tools through MCP servers and implemented human-in-the-loop review using LangGraph interrupt/resume, with PostgreSQL checkpointing to persist workflow state across restarts.

TallyNest – Personal Finance Workspace GitHub | Live Demo
React, TypeScript, Node.js, Express, MongoDB, Mongoose, Zod

- Developed a full-stack financial workspace supporting personal ledgers, monthly budgets, recurring payments, group expense splitting, and settlement cycles.
- Implemented exact monetary calculations using integer paise, optimistic concurrency with version and ETag validation, and coordinated financial writes. Built equal, exact, and percentage split calculations with settlement safeguards.

CrewFlow – Workforce and Task Management Platform GitHub
React, TypeScript, Python, Flask, SQLAlchemy, PostgreSQL, Docker

- Built a workforce management platform with seven role-based access levels and department-scoped permissions, supporting task assignment, completion workflows, Kanban boards, dashboards, searchable task lists, and audit activity.
- Developed REST API and database functionality using Flask, SQLAlchemy, and PostgreSQL, with automated backend tests and frontend testing using Vitest.

Certifications & Selected Training

- **Oracle AI Vector Search Certified Professional** – Oracle University *Sep 2025*
- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate** – Oracle University *Sep 2025*
- **Cloud Computing** – NPTEL, IIT Kharagpur *2026*
  Elite + Topper (Top 5%); 91% consolidated score
- **5-Day Gen AI Intensive** – Kaggle
- **AWS Technical Essentials** – AWS Training & Certification *Sep 2025*
